

Date: December 28, 2017

To: Families, Friends and Visitors to RML Specialty Hospital

From: Infection Prevention Department

Re: Visitor Restrictions during Influenza Season

Our highest priority is the health of our patients and their families, our staff and the community. Therefore, due to the increased incidence of flu in our community, RML Specialty Hospital is instituting visitor restrictions effective December 28, 2017.

These include:

- Please do not visit if you have acute respiratory symptoms (fever, cough, sore throat).
- Children, 12 years of age or under, are not permitted to visit patients. We ask that you please do not bring children to the hospital during your visit with friends and family.
- Number of visitors are limited to 2 per patient at any one time.

We appreciate your assistance in keeping our patients as safe and healthy as possible.

Thank You,

Jennifer Rettmann, RN BSN CIC
Director of Infection Prevention and Employee Health
RML Specialty Hospital
